100% PREMIUM COTTON VELVETS

CATALOGUE · 3500 UPHOLSTERY VELVET · 350 G/M²

Contract & Hospitality

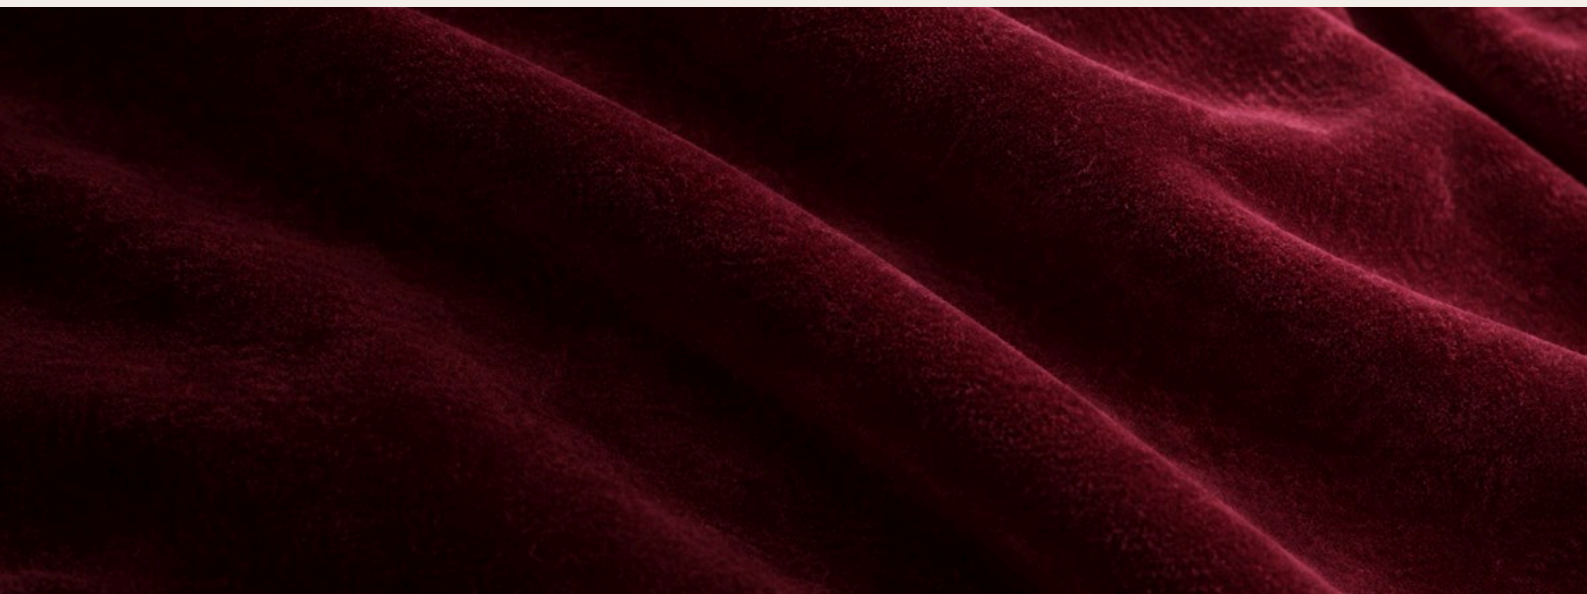

Specified to last.

Nearly half a century devoted to a single material.

— ◆ —

Since 1979 we have devoted ourselves to one thing alone: cotton velvet. Two weights, endless possibilities. 3000 Cotton Velvet, dense and noble, to dress bodies. 3500 Upholstery Velvet, full-bodied and serene, to dress spaces. A chosen specialisation, a textile heritage sustained for nearly half a century, a standard that is not negotiable.

We believe a fabric is not merely a surface, but the atmospheric soul of a space.

THE CRAFT · CONTRACT & HOSPITALITY

For specified projects.

Hotels, restaurants, auditoriums and theatres: projects with specifications, deadlines and a colour that has to be exactly that one. The 3500 is designed for them.

The 3500 is developed with a flame-retardant treatment for contract use, with the weight and pile density that auditorium seats, banquettes, hotel headboards and stage curtains require.

APPLICATIONS

Typical uses

- ◆ Auditorium and theatre seating
- ◆ Stage curtains and drapery
- ◆ Hotels: headboards and lounges
- ◆ Restaurants: banquettes and chairs
- ◆ Acoustic panels
- ◆ Luxury retail

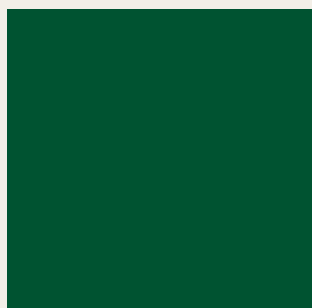

For the designer, colour is usually decisive: we start from our 25 references or from the project's standard and develop it by lab-dip until it is approved.

HOTELS · RESTAURANTS · RETAIL

A colour for every space.

Emerald in the lobby, burgundy in the restaurant, plum in the fitting room, petrol blue in the auditorium: the 3500 keeps the same 25 references as the 3000 in stock and, when a project calls for another shade, we develop it by lab-dip from 300 metres.

Why Velvetes

01 **FR-ready**

Developed with a flame-retardant treatment for contract; classification by market.

02 **Exact colour**

Lab-dip development and colour locked for the project's repeat orders.

03 **A technical partner**

A team that handles specifications, samples and site deadlines.

THE ARTICLE

3500

Upholstery Velvet

Dresses spaces.

The weight upholstery and contract were asking for: 350 g/m² of cotton, more body and a denser surface. It is stocked in the same twenty-five references and can be developed in the exact colour of each project.

VELVETES · CONTRACT & HOSPITALITY

THE MATERIAL

More body, the same light.

Seventy grams more per square metre that you feel in the hand and in the seat: a more compact pile that works stretched over volumes, headboards and armchairs.

The same relationship with light as the 3000 — it absorbs rather than bounces — in a fabric built for the way spaces are used.

Twenty-five colours. Five families.

The same card as the 3000 catalogue, reference by reference. Cotton takes dye like few other fibres: every colour gains depth on the velvet pile.

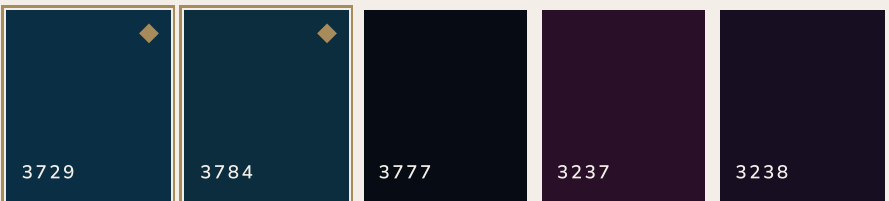

Statement Reds

Sophisticated reds with presence and character, for garments that take centre stage.

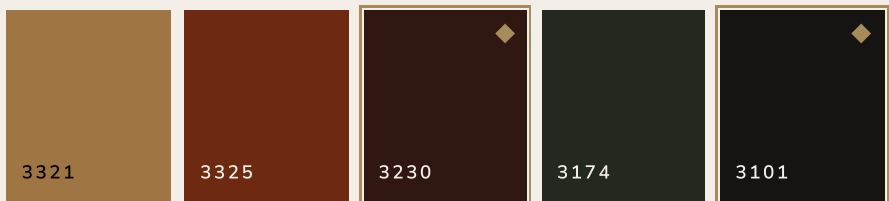

Nocturnal Velvets

Depth, mystery and elegance: dark tones where light defines volume.

Atelier Browns

Warm, earthy tones inspired by the atelier and handcrafted work.

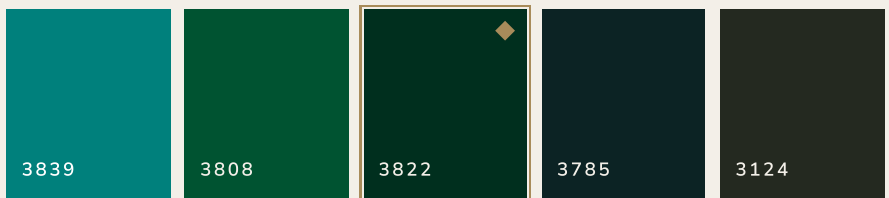

Modern Romance

Powdery pinks, violet and grey: romance through a contemporary lens.

Jewel Greens

Deep greens inspired by nature and precious stones.

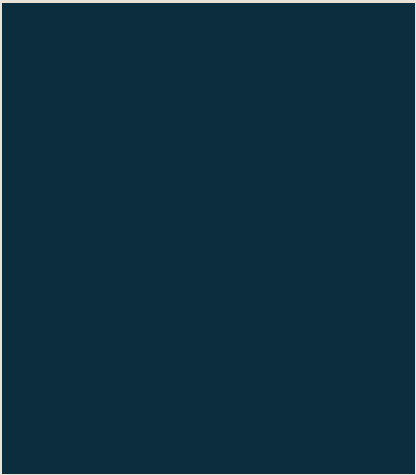

◆ Recommended for this craft

A selection to start with.

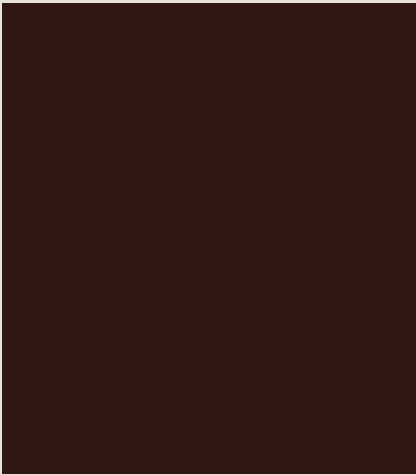

Six references that work especially well in this craft. All 25 colours on the card are in stock in both weights. Need another? We develop it to order from 300 metres.

3101 ATELIER BROWNS

On-screen colours are indicative and depend on each display. To specify, always approve on a physical sample.

The exact colour of your project.

If the colour is not on the card, we develop it. In 3000 or 3500, we start from your reference and match it through lab-dips, order by order.

300

M Minimum per custom colour, in 3000 or 3500

01

Reference

You send us the target colour: a physical sample, a Pantone or NCS reference, or one of our 25 references as a starting point.

02

Lab-dips

We prepare dyeing proposals on the chosen article, 3000 or 3500, and send them to you for assessment under standard light.

03

Approval

You choose and approve the lab-dip. That reference is locked for your project.

04

Production lot

The batch is dyed to the approved colour, from 300 metres, and shipped from Spain.

Technical data.
